

VAIBHAV AGARWAL

Senior Software Engineer | Java | Distributed Systems | Microservices | AWS

+91-7406389664 | avaibhav51@gmail.com | linkedin.com/in/avaibhav51 | Bangalore, India

SUMMARY

Senior Software Engineer with 7.5 years of experience building scalable microservices and distributed systems in Java. Specialized in high-throughput event processing, multithreaded systems, and end-to-end module ownership. Proven track record of optimizing performance, reducing costs, and leading engineering teams in enterprise B2B SaaS environments.

TECHNICAL SKILLS

Languages & Frameworks: Java (8, 11, 17, 21), Spring Boot, Hibernate, JUnit, Maven

Architecture & Systems: Microservices, Distributed Systems, Event-Driven Architecture, RESTful APIs, System Design, Multithreading, Batch Processing

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD Pipelines, Git

Data & Messaging: Kafka, MySQL, Spark, Redis, Data Pipelines, Query Optimization

Observability: Prometheus, Grafana, Amazon Timestream

Practices: Data Structures & Algorithms, Agile/Scrum, TDD, Code Reviews, Mentorship

AI Tools: Claude (Amazon Kiro), ChatGPT, Efficient prompting, Reduced token usage

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Securonix | Bangalore, India

Jul 2025 – Present

Multi-tenant cloud SIEM platform providing B2B cybersecurity solutions.

- Own end-to-end delivery of revenue-generating features leveraging multithreading, batch processing, and Kafka-driven microservices - from design through deployment and post-release analysis (Java 21)
- Utilized AWS services (S3, SNS, RDS, IAM) & Spark server to efficiently manage data load at scale
- Implemented a new visibility and alerting feature UI using Timestream + Prometheus + Grafana for observability and system health monitoring and deployed through Amazon EKS
- Collaborate with DevOps to architect near-zero downtime deployment strategy for monolith upgrades, reducing application downtime and enabling smoother rollouts
- Reduced resource consumption of a critical microservice by ~80%, saving significant infrastructure costs by ~72%
- Led a team of 8 engineers for 4.5 months, ensuring timely delivery and stable releases

- Conduct technical interviews, mentorship, and onboarding of new team members
- Participate in Architecture Review Board (ARB) discussions across teams

Software Engineer | Securonix | Bangalore, India

May 2022 – Jun 2025

- Optimized APIs & event-processing pipelines handling high EPS data using Kafka & Microservices - filtering, enriching, and analyzing security events, and achieving 20–30% throughput improvement through query tuning, database and code optimizations
- Migrated a module from monolith to springboot microservices; executed Java 8 to 17 upgrade, resolving compatibility issues and improving maintainability
- Built internal debugging utilities that reduced manual investigation time by 40%
- Leveraged Claude with efficient prompting and reduced token usage to identify gaps and strengthen overall product quality
- Collaborated with product, support, and TAM teams for POCs, customer demos, and resolution of business-critical issues
- Authored design docs, architectural notes, and release documentation to improve cross-team visibility

Senior Engineer | Nagarro (Securonix) | Remote

Nov 2021 – May 2022

- Contributed to enhancements and maintenance of core services, focusing stability
- Participated in design discussions, defect triaging, and testing during release cycles

Software Development Engineer | Verifone | Bangalore, India

Jan 2020 – Nov 2021

POS solutions for Petroleum and Convenience stores supporting multiple payment modes.

- SME for two card brand specifications, adopted across multiple customers
- Managed and optimized payment/refund processing and batch settlement workflows while adhering to PCI compliance standards
- Analyzed business requirements and assessed functional and technical impact
- Conducted code reviews, KT sessions, and created utilities for faster debugging

Associate IT Developer | Medtronic | Bangalore, India

Feb 2019 – Jan 2020

- Worked on an ECM system for document workflow management in a healthcare environment
- Automated archival + cleanup process by scripting, reducing manual operational overhead

EDUCATION

PG Diploma in Advanced Computing | CDAC ACTS, Pune | 2018 – 2019

B.E. in Computer Science | REVA ITM, Bangalore | 2014 – 2018
